Microservicios- Examen final - práctico

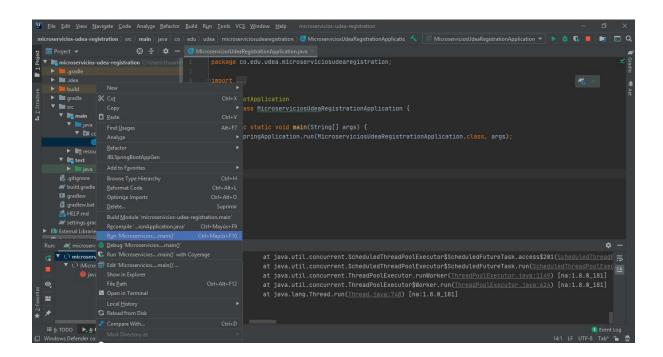

Paola Andrea Posada Restrepo 1001242646

Evidencias

1. Se importa el arquetipo creado con el asistente web

2. Correr el main

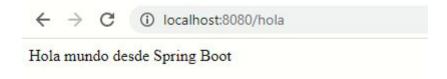

3. Abrir el localhost

4. Se crea la carpeta Controller y en ella la clase HomeController que contiene el siguiente código

```
| File Ent Yew Berights Code Analyze Edector Build Run Ioels VCS Window Help microservicious udea registration in convervicious udea registration in convervicious udea registration in convervicious udea registration in convervicious udea registration in vivo convervicious udea registra
```

5. Nuevamente se corre el main y se busca localhost:8080/hola

6. Se crea la clase usuario, con su constructor y sus get's y set's

```
| File Ent. Yew Norigate Code Analyze Bridd Rum Tools VC Window Help microservicious udea-registration | Normal year of cells volds | microservicious udea-registration | Normal year of cells volds | microservicious udea-registration | Normal year of cells volds | microservicious udea-registration | Normal year of cells volds | microservicious udea-registration | Normal year of ContectAptiyare | Normal year of ContectAptiyare | Normal year of ContectAptiyare | Normal year of Microservicious udea-registration | Normal year of Normal yea
```

7. Luego se crea el paquete api y que contiene una clase llamada ContactApi que se encarga de crear un usuario y mostrarlo

```
### File Edit (Wew Names Code Analyze Edector Build Rgm Teck VCS Window Help microservices-udea-registration Main June 10 DEA — 0 × microservices udea-registration and June 10 DEA — 0 × microservices udea-registration and June 10 DEA — 0 × microservices udea-registration and June 10 DEA — 0 × microservices udea-registration and June 10 DEA — 0 × microservices udea-registration very large and the controller of the property of the controller of the property of
```

8. Se busca localhost:8080/contact

9. Sin embargo arroja un XML y la actividad pide un JSON, por tanto se ajusta la clase ContactApi.

10. Finalmente, se obtiene un Json

```
← → C ① localhost:8080/contact
